

Low-Cost, Single-Use Gel Packs

Uniform cold for cost-conscious shippers

Our economy gel packs are designed to be some of the lowest cost on the market. TempAid gel packs are an economical alternative to the ice commonly used in insulated shippers for transporting meal kits, laboratory specimens, and meats.

These cost-effective gel packs, created and tested in TempAid Labs, feature a long-lasting, non-toxic polymer that cools uniformly and colder than ice. It is encased in our standard PE/PA film and tested for maximum effectiveness.

FEATURES

TempAid ice gel packs are readily available in different sizes or you can contact us for customized solutions based on your specific requirements or applications.

- Flexible and can be molded before freezing for tight pack-outs
- Safe for air freight
- Ready to freeze
- Can be ordered with or without printing on the outside. Custom branding available.
- Food grade per FDA regulations

APPLICATIONS

- Meal kits, pharmaceuticals, fish, meat, cheese, or chocolate
- With a courier for home delivery or a long haul flight
