

Biodegradable Insulated Coolers for Cold Chain Packaging¹

TempAid™ insulated shippers are made from a rigid foam making it lightweight and low cost

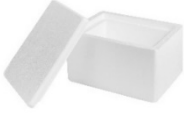

TempAid coolers are tested by cold chain specialists in our ISTA certified thermal testing lab to save costs in weight and refrigerant, while assuring consistent temperatures for any pack out.

We offer two types of molded expanded polystyrene (EPS) coolers:

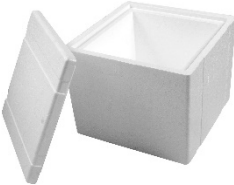

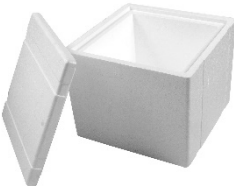

- Standard biodegradable EPS
- High-density biodegradable EPS

EPS, EPS-Bio, and EPS HD coolers are available in all the listed sizes below. We also offer a tough, lightweight Expanded Polypropylene (EPP) outer shell in several sizes.

*Safety data sheets, anaerobic bio-degradation testing details, and other documentation are available upon request.

¹ The resin used in these coolers biodegrade 92% over four years. They were tested using sample items under conditions simulating both wet and biologically-active landfills using the ASTM D5511 test. The extent of degradation and stated rate do not mean the product will continue to decompose. The data stated above has been provided in good faith and believed to be reliable, it does not constitute a part of our terms and conditions of sale unless specifically incorporated in our Order Acknowledgment.

² EPP coolers are not biodegradable.

ABOUT TEMP AID a division of Rapid Aid Corp., manufactures a complete line of cold chain solutions designed for optimal temperature stability in the food, pharmaceutical, and laboratory sectors. As part of the Rapid Aid brand, the company has been delivering solutions to the market since 1975. The company has the capacity and manufacturing capability to deliver hundreds of millions of units per year.

While every attempt is made to present this information as accurate as possible, information may become dated over time and should not be relied on as the only source of data for making decisions. Please consult your TempAid sales manager before ordering any product.
